# Welcome to TEMPUR®

What if your body felt so relaxed, almost as if you were floating? TEMPUR® mattresses conform and adapt to the shape of your body and support you in a way that makes you feel weightless.

Our story began when NASA developed a pressure absorbing material to cushion and support astronauts during the strain of lift-off. They needed an exceptional way of evenly distributing weight and pressure.

This unique material later became TEMPUR®. Since then, through further research and development by our scientists and engineers, we have perfected and extended this technology to create a collection of mattresses, sleep system and pillows, that give you your best night's sleep.

TEMPUR® is the only mattress and pillow recognised by NASA and certified by the Space Foundation.

Today, only a handful of top TEMPUR® scientists know the proprietary formula to make TEMPUR® material. We manufacture the material in our production facilities in Denmark and the United States, never outside

# Feel the difference of TEMPUR®

## Feel Weightless

At TEMPUR® we believe that whatever your shape, size or age, your mattress should contour to the unique shape of your body, and not the other way around. That's why we have a range of mattresses and pillows, to give you the personalised support you need while you sleep. With the help of your local store, we encourage you to test our products and let your body decide. We believe that with our innovative sleep technology, all you'll feel is weightless.

## Superior Comfort & Support

Once you have slept on a TEMPUR® mattress and pillow, you realise there is no comparison. The TEMPUR® temperature sensitive material conforms to the shape of your body. It reduces the discomfort caused by pressure points by redistributing pressure so you can immediately relax into your most comfortable sleeping position and remain there fully supported. It is this balance of outstanding comfort and superior support that has earned TEMPUR® a number one ranking for 'overall customer satisfaction' and 'overall quality of sleep' in each of 13 countries surveyed\*.

\*The findings are based on interviews with over 1,300 TEMPUR® mattress purchasers in 13 European countries. The percentage of satisfaction is high in each country but not identical.

*Ordinary spring mattresses can cause unnatural sleeping positions and pressure resulting in numbness and discomfort.*

## Trusted Results and Quality

TEMPUR® products are recognised and purchased worldwide for the comfort and superior support they provide. Satisfied customers also report that these products have provided comfort when suffering with back, joint and neck problems, as well as sleep difficulties. TEMPUR® material is produced solely in company owned production facilities where the products are developed and tested to ensure the highest standards of quality and are all supported by a comprehensive warranty.
